1. WELCOME TO BIZERTE

Bizerte is located at 65 kilometres to the Northwest of Tunis, the capital of the country, and five kilometres from cap Blanc, the northern most point of Africa . The city is located at the south-eastern tip of an isthmus on the north shore of the channel of Bizerte connecting the sea to the Lake of Bizerte. It is connected to the rest of its urban area located on the South Bank of the canal, by a Mobile Bridge which leads directly to the A4 motorway leading to Tunis.

Bizerte was founded around 1100 BC by Semitic Phoenicians from Tyre. Initially it was a small Phoenician Harbour for maritime trading in the western Mediterranean. Located 60 km (37 mil) of Carthage, the great city founded by Phoenicians. Around 950 BC the city came under the influence of Carthage under the leadership of Queen Dido/Elissa. In 309 BC, during the Greek–Punic Wars, its port is used by several Carthaginian generals as Hamilcar Barca, Mago, Hasdrubal and Hannibal.

In 149 BC, the city was occupied by the Romans under the name of Hippo Diarrhytus during the period of Julius Caesar reign.

In 439 AD, the Vandals (East Germanic tribes) invaded the city and they used the port to accomplish their invasions of the rest of the Western Roman Empire, the city of Rome and the islands of Sardinia, Malta, Corsica and Sicily.

From 534 AD to 642 AD, the city returned to eastern Romans under the Byzantine Empire, after a defeat of the vandals in 534, and they build the Fort of Bizerte (now the Fort of Kasbah).

Bizerte was taken by Arabs in 647 in their first invasion, but reverted to Byzantine control until they were defeated and driven from North Africa finally in 695-98, by the troops of Charles V in 1535 and then by the Ottomans in 1574. The city then became a corsair harbour and struggled against the French and the Venetians. Later with the occupation of Tunisia in 1881, France gained control of Bizerte and built a large naval harbour in the city.

Due to Bizerte's strategic location on the Mediterranean, France retained control of the city and her naval base after Tunisian independence in 1956. In 1961, Tunisian forces blockaded the Area of Bizerte and demanded French withdrawal. Meetings at the UN Security Council, and other international pressure moved France to agreement; the French military finally abandoned Bizerte on 15 October 1963.

10. SCORING AND CLASSIFICATION

- The calculation is done in two steps:

STEP 1: Traditional Points (P.T.)

The amount of points obtained by the captures in groups, calculated as follows: one point per gram of each valid catch plus the established bonuses.

The max valid weight for the scoring of the catches of any group will be 12500 g.

Catches that weigh more than 12500 gr will score this maximum value plus the bonus, although total real weight will be considered in the event of the existence of an award for the Biggest Catch.

BONUSES:

- Each valid catch will have a 500 points bonus.
- Each different species will have a 500 points bonus.
- Additional bonus of 1000 points when the full quote of catches of a certain species is completed.

STEP 2: Percent Punctuation (P.P. %)

The total punctuation of each athlete on each day will be a percentage taking as reference the punctuation of the athlete with the highest score in that day of the competition.

The athlete who obtains the best punctuation will be credited with the 100% and the points of the rest of the athletes will be calculated as a prorata percentage of that punctuation. The percent values will be rounded up to the third decimal.

- **Formula for calculation the individual points:**

$$\frac{\text{Punctuation of each athlete} \times 100}{\text{Punctuation of the first classified of the day}}$$

The classification will be calculated in points, following the precedent rules.

The athlete who presents his catches in a bag other than the official one provided by the organization, will be penalized by removing them from bag and water and will be the last at the order of weighing.

- **PENALTIES:**

- Any catch not reaching two thirds of the minimum weight of their category, will generate a penalty (negative points), equal to the minimum weight of the category/group.
- In the event of one fish exceeding the established limit of catches of one species, the two heavier catches of the species will be removed and the bonus per species will not be awarded.
- In the event of the established limit of catches in **Group 3** and **Group 5** have been exceeded, the penalty will be **disqualification from the championship**.
- If a competitor exceeds by two or more the limit of catches of one species, all the catches of the concerned species will be disqualified for the day of competition.
